

Classification

Personal documents acquired from third offices are systematically added to the documentation already available, following archival ITS-criteria.

- **Incorporation into the inventory** of the document through sorting, labelling and registration
- **Card-indexing** of the names and of the indication of the place of deposit of the document
- **Insertion in alphabetical-phonetical order** into the Central Index of Names
- **Filing in the archives** of the processed records.

Preservation

Appropriate storage, restoration and security-filming of the documents are part of this ITS-mandate. This does not depend on whether new or old material is concerned.
